

# Double Bass Concerto No.1

Ed. Isaac Trapkus  
(b.1984)

Transcribed from the manuscripts for bass and piano/orchestra

Giovanni Bottesini  
(1821-1889)

version: 2021/1/12

Editor's Note: There are 4 surviving manuscripts of this piece - each with different markings. The manuscript in F♯ minor for bass and piano is visually the cleanest version, but also contains the most wrong notes - possibly the work of a copyist. This edition takes the common elements from each manuscript while giving some extra weight to the markings of the F♯ minor piano version, since, despite its faults, it is likely the most recent version. This part does not contain any additional interpretive markings of my own.

## I

**Allegro moderato**

\*) Since this double-stop is not playable with harmonics, it is reasonable to assume the bottom note is to be played the first time and the top note is to be played the second time.

\*) This pickup is a quarter note in the manuscripts for full orchestra.

\*\*) The last two triplet notes of this measure are written as a dotted 8th and 16th in the orchestral manuscripts.

\*\*\* There is no B (Si) in the orchestral manuscripts and the preceding E (Mi) is instead an 8th note.
